Hunting Line - New Products

The model 1782 is now available in Gold Line and Black Line versions. These models are characterized by specially coated barreled action components and result in unique overall packages, which are convincing in functionality and appearance all along the line. For friends of the synthetic stock, the ANSCHÜTZ 1782 is now also available in the well-known and proven GRS Bifrost stock, which can be adjusted to the respective situation in just a few steps thanks to the Speed-Lock 2.0 system.

Sport Line - New Products

For the friends of small bore target shooting we present the ANSCHÜTZ Premium

small bore target rifle 22 MAX - for all those who want to win and achieve the maximum - maximum details for maximum success. For the beginners and advanced levels we present the model 1761 Match Walnut, a precise and extremely reliable target small bore rifle, which is also perfectly suitable as a club rifle.

Biathlon - New Products

The new 8000 rear sight series has been developed and produced to the highest quality standards. The use of stainless steel makes the rear sight weather resistant.

Thanks to the wide range of accessories, the rear sight is suitable for biathlon as well as for target small bore rifles and air rifles.

Light Beam Shooting - New Products

LaserPower IV in ULTRA LIGHT - neon green - the absolute lightweight among the LaserPower light beam rifles. This 3D-printed stock weighs approx. 810 g thus an overall weight of approx. 2000 g in combination with the LaserPower barreled action. In terms of weight and dimensions, this model is designed for the physical requirements of approx. 8-12 year-olds.
